Software Engineer | MERN Stack & Python Developer | Web Applications

PROFESSIONAL SUMMARY

Full-Stack Software Developer specializing in the MERN stack, JavaScript (ES6+), and Python scripting. Proven track record of building production-ready web applications, designing RESTful APIs, and optimizing SQL/NoSQL databases for client and personal projects. Hands-on experience developing log monitoring pipelines, automated workflows, and responsive user interfaces. Strong foundation in software design, problem-solving, and deployment pipelines.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript (ES6+), Python, HTML5, CSS3, SQL
- **Frameworks & Libraries:** React.js, Node.js, Express.js, Vite, Mongoose, PyMongo
- **Databases:** MongoDB, MySQL, SQLite3
- **Developer Tools & Platforms:** Git, GitHub, REST APIs, Vercel, Postman, Webhooks, Jest (Unit Testing)

FREELANCE EXPERIENCE

Full-Stack & Frontend Developer (Freelance) | Mobmax LLC-FZ (Dubai, UAE)

- Designed and deployed the official commercial website for an international trading company using React.js and modern CSS frameworks.
- Optimized client-side performance and mobile responsiveness, improving page load speed by ~30% and ensuring cross-browser compatibility.
- Integrated SEO metadata and structured web schema, improving brand visibility and organic client inquiries.

Frontend Developer (Freelance) | Sangam Marketing (Bhilwara, India)

- Built an interactive product portfolio website showcasing dynamic product categories, brand associations, and contact workflows using React.js.
- Implemented clean component architecture and reusable UI elements to deliver a fast and responsive user experience.
- Managed site deployment on Vercel and handled ongoing content updates for local business growth.

Web Application Developer (Freelance) | Maa Baglamukhi Nalkehda

- Developed a high-traffic community portal built with React.js, serving thousands of monthly visitors with 99.9% uptime.
- Streamlined frontend asset loading and caching strategies to maintain low latency across mobile devices.

TECHNICAL PROJECTS

Python Automated Log Monitoring Pipeline | *Python, SQLite3, Webhooks, Regular Expressions*

- Engineered a multi-file Python automation pipeline to ingest, parse, and analyze multi-source server log files in real-time.
- Structured data persistence layer using SQLite3 to record log metrics, error frequencies, and alert thresholds.
- Integrated automated HTTP webhooks to instantly notify developer teams when critical system logs exceed predefined thresholds.

Myntra Clone – Full-Stack MERN E-Commerce App | Live Demo | *React.js, Node.js, Express.js, MongoDB, REST APIs*

- Built an end-to-end e-commerce platform featuring JWT authentication, product search filtering, cart state management, and payment gateway integration.
- Designed RESTful API endpoints and MongoDB schema relationships for seamless order processing and user inventory management.
- Configured automated deployment pipelines on Vercel with environment variable configuration for staging and production environments.

Real-Time Weather Forecasting Platform | Live Demo | *React.js, OpenWeather API, Tailwind CSS, Vite*

- Developed a responsive weather platform consuming live REST APIs to display real-time weather metrics and multi-day forecasts.
- Implemented debounced user input handling, dynamic error handling for invalid location queries, and local storage caching.

EDUCATION

B.Tech – Computer Science & Engineering | *Pursuing (Lateral Entry)* — *2025 – 2028*
Jaipur Engineering College | Jaipur, Rajasthan

Bachelor of Arts (B.A.) — *2022 – 2025*
MLV Government PG College | Bhilwara, Rajasthan

Diploma – Electrical Engineering — *2021 – 2024*
Government Polytechnic College | Bhilwara, Rajasthan
