Tools & Platforms: Git, GitHub, REST APIs, Vercel, Payment Gateway Integration, Canva, AI Tools

FREELANCE PROJECTS

Frontend Developer (Freelance) | Mobmax LLC-FZ

- Designed and developed the official website for Mobmax LLC, a Dubai-based import-export company, using React.js.
- Delivered a modern, responsive UI aligned with the company's brand identity and service offerings.
- Optimized the site for performance, SEO, and cross-device compatibility.

Frontend Developer (Freelance) | Sangam Marketing

- Built a professional, high-performance company website for an electronic devices import-export firm using React.js.
- Implemented a clean, responsive layout showcasing product categories, brand partnerships, and contact information.
- Delivered the project end-to-end, improving local business visibility and online presence.

Frontend Developer (Freelance) | Maa Baglamukhi Nalkehda

- Designed and developed a comprehensive community and informational website using React.js to deliver a seamless, responsive user experience.
- Optimized frontend performance, ensuring fast asset loading and intuitive navigation across mobile and desktop devices.
- Deployed and maintained the live platform, ensuring high uptime and smooth user interactions.

PROJECTS

Myntra Clone | Full-Stack MERN E-Commerce App

- Built a full-stack e-commerce application using MongoDB, Express.js, React.js, and Node.js (MERN stack).

Weather Forecasting App | Real-Time Weather Application

- Developed a weather forecasting application consuming live third-party weather APIs.
